PROFESSIONAL

Physiotherapist and student of programming and systems analysis. Extensive theoretical and practical experience in the health area. Ability to work in a team, good communication and proactivity. Strong problem-solving skills in emergency cases. Interest in learning, growing and applying skills and knowledge to new projects.

OBJECTIVE

My solid experience in the health area made me realize the importance of technology and program development, so I am currently looking for an opportunity in the technology sector. After years of experience in the hospital field, I intend to enter the systems analysis and programming market in order to expand my activities. My theoretical and practical background made me aware of the technological needs in healthcare and motivated my desire to enter the field of IT studies. I want to learn from experienced professionals, develop myself in the field and build efficient and innovative solutions.
